

ZORRO RANCH RECORDS, PRESENCE, AND NEW MEXICO REGISTRATION INQUIRY

A source-anchored packet for a New Mexico truth-commission-style inquiry into post-conviction guest access, staff-managed lodging, operational record systems, aviation corroboration, and registration/presence thresholds.

PREPARED BY: JOSEPH GOYDISH II
PGP FINGERPRINT: 4A04 1F50 6D89 4F5E E391 7438 6487 8B56 A2EB 2D11

WHAT THIS IS A Bates-anchored inquiry packet. It does not allege guest misconduct. It identifies records, custodians, and threshold facts that can test Zorro Ranch presence, lodging, and reporting duties.	WHAT IT SHOWS The source pages show post-conviction guest logistics, staff-managed lodging, Ranch Central systems, gate/phone/lodge lines, telecom infrastructure, aviation access, and New Mexico registration relevance.	WHAT CAN BE DONE Demand guest logs, staff instructions, gate and phone records, pilot manifests, aircraft logs, FBO records, NM DPS/county files, vendor records, and original task/checklist metadata.
--	--	---

CONTROLLED POSITION
The record crosses the subpoena and witness-interview floor. It does not yet cross the violation floor for New Mexico registration, spoliation, or misconduct by named guests.

CORE WINDOW 2009-2015 guest and operations records	PRIMARY LANE Zorro Ranch / New Mexico	SOURCE TYPE DOJ/EFTA Bates text	POSTURE Documentary inquiry packet
--	---	---	--

GUEST ACCESS WAS ROUTED THROUGH STAFF AND FACILITIES

WHY THIS MATTERS

These records create date windows and custodian targets: lodge and bunkhouse occupancy, room turnover, travel details, airport routing, staff instructions, phone logs, vehicle records, and guest communications.

GUEST WINDOW	USE IN PACKET	LIMIT
Jarecki, Sept. 27-Oct. 2, 2009	Shows lodge/bunkhouse logistics and Brice travel-detail role.	Does not prove Epstein was physically present.
Ribis, Oct. 6-9, 2010	Shows guest lodge, staff, horseback riding, and indoor-pool access language.	Does not prove legal trigger or misconduct.
Thiel, Aug. 2015	Shows late-period invite and airport routing to Albuquerque, Santa Fe, and Moriarty.	Does not prove the trip occurred.

STAFFING AND FACILITY DUTIES

If sufficient, much work can be accomplished by us here and we only have to buy material. As we see it, we would like to hire: (1)Main housekeeper (to live in the staff cottage). She will be responsible for the upkeep of the house. Salary of \$25,000/yr (1)Carpenter (to possibly live in staff house at Ranch central). Will help with all building, repairing, painting, drywall, fencing. Salary of \$30,000/yr.(Depends on living...

FACILITY MAINTENANCE BURDEN

It takes most of my time just to maintain things at some sort of level that I am actually not happy with. With taking care of the Main House, Lodge, Bunkhouse, Greenhouse, Stables, Yurt(in need of repair), caboose, and Log Cabin, I am not able to keep things as clean and tidy as I once did. I also see things in Mano's areas that he tends to that are in need of attention, However; he is spread so thin keeping all mechanically...

RECORD TYPES THE PACKET CAN DEMAND

SYSTEM	RECORDS TO DEMAND	WHAT IT TESTS
Ranch Central / Zorro office	Office email, phone/fax logs, staff instructions, guest communications, line logs.	Who handled guest stays, directions, and internal routing.
Guest lodge / bunkhouse / main house	Occupancy logs, room prep, turnover notes, maintenance requests, housekeeping records.	Who stayed, where, and on what dates.
Gate / vehicle / security / fire alarm	Gate logs, service tickets, access records, alarm/HVAC records, vehicle use logs.	Arrival/departure and facility-use corroboration.
Task lists and maintenance schedules	Original files, metadata, full folders, missing periods, staff signoffs, vendor invoices.	Custody, continuity, and whether routine logs existed for key windows.
Telecom vendors	CenturyLink, Time Warner/tw telecom, Advanced Communications, VoIP/fiber service records.	Line ownership, call/fax/log systems, retention, and service topology.

DO NOT OVERSTATE

Telecom, gate, and maintenance infrastructure are record-system evidence. They do not by themselves prove surveillance misuse, concealment, abuse, or destruction.

AVIATION RECORDS ARE THE CLEANEST PRESENCE TEST

WHY THIS MATTERS

Presence and duration are the facts needed to test any New Mexico registration or reporting theory. Flight and FBO records are stronger than guest-invite emails because they can show actual arrival, passengers, aircraft, fuel, parking, crew, and departure.

EFTA00068582 P.24

RANCH CENTRAL LAYOUT AND GUEST/PILOT ROOMS

anley, New Mexico. So you drove down a dirt road approximately a half mile and you would enter an area which the ranch called the Ranch Central, and that housed many buildings. Just to the left, there were two homes, and that was mainly for the ranch staff that lived on the ranch for support. So there were two homes to the left. To the right, there was a small office for the ranch. And then you continued, you're still in the...

EFTA00068582 P.25

RUNWAY, HANGAR, LODGE, LOG CABIN

pass by, during that drive, a runway we had on the property, which, as you saw, the twin-engine Cessna was parked on. So we had a runway and a hangar to house the aircraft. So you pass the runway and you continued up the road to -- it was called the lodge. It was actually the first home site that was selected to build the main house, and that was a triple-wide trailer that also had a western faux facade built around it. Once...

DOJ-0GR-00013279 P.113

PILOT RECORDS: MANIFESTS, AIRCRAFT LOG, LOGBOOK

ing your time working as a pilot for Mr. Epstein, what, 4 if any, records did you keep about the flights that you 5 piloted? 6 A. We kept a passenger manifest which we filled out after 7 every flight. And then at the end of the day, we had an 8 aircraft log that we put down flight times that we flew on that 9 particular day. And then I also kept a personal logbook. 10 Q. Walking through each of those, starting with the flight...

DEMAND	WHY
Passenger manifests and aircraft logs	Can identify who traveled, departure/destination, flight time, fuel, and aircraft-use dates.
Pilot personal logbooks	Independent corroboration of aircraft movements and duty dates.
FBO / airport records	Fuel, hangar, parking, tie-down, service, crew, vehicle, and catering records at Santa Fe, Albuquerque, and Moriarty-area facilities.
Ground transport records	Tests whether guests, staff, pilots, chefs, or Epstein were moved from airports to Zorro.

THE SHARP LEGAL THEORY IS CONDITIONAL

EFTA00074029 P.20

NEW MEXICO DPS REGISTRATION CONTEXT

Defense Counsel has submitted a letter, dated August 19, 2010, from Assistant Bureau Chief, Law Enforcement Record Bureau of the New Mexico Department of Public Safety, which states that Mr. Epstein "is not required to register [as a sex offender] with the State of New Mexico at this time for [his] 2008 Florida conviction of Procuring [a] Person Under 18 for Prostitution." Dkt. 25, Ex. A. The Court requested from the Defense...

CONTROLLED POSITION

The registration question is investigation-worthy because it was legally salient in later litigation and because Zorro records may test presence and duration. A violation should not be alleged unless the applicable New Mexico trigger and physical-presence facts are established.

QUESTION	NEEDED PROOF
Did Epstein have to register or notify New Mexico?	Year-specific statute, DPS/county correspondence, any legal determination, and travel/presence facts.
Did temporary lodging or residence trigger a duty?	Exact arrival/departure dates, overnight stays, total days, and whether visitor/residence provisions applied.
Did another jurisdiction notify New Mexico?	Florida, New York, Virgin Islands, NM DPS, and county sheriff records.

PRESERVATION IS A DEMAND, NOT YET A SPOILIATION CLAIM

USE THIS CAREFULLY

The records show that log-bearing systems likely existed. That supports preservation demands and retention-policy questions. It does not yet support claims of deletion, purge, shredding, altered metadata, or missing-month concealment.

RECORD FAMILY	PRESERVATION DEMAND	THRESHOLD TESTED
Guest lodge line/fax/log	Original books/files, phone/fax records, scan archives, custodians, retention policies.	Guest presence and lodging dates.
Task lists / checklists	Native files, version history, missing periods, signoff sheets, staff circulation.	Continuity of routine ranch records.
Telecom / gate / HVAC / fire alarm	Vendor service tickets, logs, exports, support contracts, system migrations.	Facility use, access, and retention.
Aviation records	Passenger manifests, aircraft logs, personal pilot logbooks, FBO invoices.	Presence/duration and passenger identity.

WHAT TO ASK FOR FIRST

RECIPIENT	DEMAND / INTERVIEW TOPIC	PURPOSE
NM DPS / county sheriff	Registration, non-registration, inquiries, determinations, correspondence, and notice records for Zorro Ranch.	Tests the legal registration/presence theory.
Zorro staff / managers	Guest logs, lodge/bunkhouse assignments, travel details, directions, room prep, gate records, staff instructions.	Tests who stayed, when, and who arranged it.
Pilots / aircraft custodians	Passenger manifests, aircraft logs, personal logbooks, tail numbers, fuel, flight planning, weather, maintenance.	Tests physical presence and duration.
FBOs / airports	Santa Fe, Albuquerque, and Moriarty-area fuel, hangar, tie-down, parking, ground transport, catering, crew records.	Corroborates arrivals/departures and passengers.
Telecom/security vendors	Phone/fax logs, guest line records, gate/fire/HVAC/camera systems, retention policies, service tickets.	Tests whether log systems existed and what remains.
Property/vendors	Task/checklist originals, metadata, staff rosters, payroll, maintenance, HVAC, mechanical, gate, vehicle records.	Identifies custodians and missing record families.

BOTTOM LINE

Zorro Ranch should be treated as a records-and-witness inquiry with a specific legal target: physical presence and duration sufficient to test New Mexico registration or reporting obligations. The present record supports subpoenas and interviews. It does not support a completed allegation of violation or guest misconduct.

PUBLIC-KEY AND SIGNATURE VERIFICATION

VERIFICATION POSITION

This packet is intended to travel with a detached PGP signature, a SHA-256 checksum, and the public key used to verify the signature. The detached signature is the integrity control; this page states the identity and verification method.

FIELD	VALUE
Signer	Joseph Goydish II
OpenPGP fingerprint	4A04 1F50 6D89 4F5E E391 7438 6487 8B56 A2EB 2D11
Detached signature file	ZORRO_NM_PRESENCE_INQUIRY_PACKET_OFFICIAL.pdf.asc
Public key sidcar	Joseph_Gs_Public_Key.asc
Checksum sidcar	ZORRO_NM_PRESENCE_INQUIRY_PACKET_OFFICIAL.pdf.sha256

VERIFICATION COMMAND

```
WINDOWS / POWERSHELL
gpg --verify ZORRO_NM_PRESENCE_INQUIRY_PACKET_OFFICIAL.pdf.asc
ZORRO_NM_PRESENCE_INQUIRY_PACKET_OFFICIAL.pdf
```

A successful verification confirms that the PDF bytes match the detached signature made with the listed key. SHA-256 confirms file identity; PGP confirms signer control of the signing key. If the PDF is changed after signing, verification should fail.
